

FADHILLAH SALMAN AL-FARISI

ELECTRICAL & INSTRUMENTATION
ENGINEER | INDUSTRIAL AUTOMATION
SPECIALIST

+62 882-1079-9862 fadhillahsalmanalfarisi26@gmail.com Jl. Parkit No 63, Garuda, Andir, Kota Bandung

SUMMARY

Electrical & Instrumentation Engineer with experience in Water Quality Monitoring System (WQMS) and Air Quality Monitoring System (AQMS) installations, industrial panel design, sensor calibration, and system troubleshooting. Experienced in field deployment, preventive maintenance, and multi-site system support. Strong interest in industrial automation, IoT-based monitoring systems, and renewable energy applications.

EDUCATION

Sarjana (S1) Teknik Informatika

BINUS University | (Ongoing)

Diploma 3 (D3) Teknik Elektronika

Politeknik Negeri Bandung | 2021 – 2024

Focus on Skill : PLC & SCADA Automation, Kalibrasi Instrumentasi, Elektronika Industri, Sistem Kendali, Maintenance & Repair

Final Project : Alat Penulis Otomatis Menggunakan Computer Numerical Control (CNC)

Sekolah Menengah Atas Negeri 4 Bandung

Jurusan IPA | 2018 – 2021

PROFESIONAL EXPERIENCE

Engineer – PT Cakrawala Bima Instrument

Bandung | Okt 2024 - Present

- Delivered 8 WQMS installation projects across government and industrial sites (DLH Bogor, Boyolali, Malang, CPO industries in Kalbar & Riau, WWTP Lippo Tangerang).
- Completed 5 AQMS installation projects across DLH Madiun, Kubu Raya, Bengkayang, and Krakatau Sarana Properti.
- Maintained monitoring systems across 84 WQMS and 17 AQMS field locations ensuring system stability and data accuracy.
- Performed troubleshooting, preventive maintenance, and field repair for environmental monitoring systems.

- Executed electrical panel wiring, instrumentation installation, and sensor integration for field systems.
- Conducted calibration of environmental sensors including pH, DO, TSS, and gas monitoring instruments.

Praktik Kerja Lapangan – PT. Caleb Technology

Bekasi, Indonesia | Jun 2023 – Agu 2023

- Installed Fire Alarm Systems in building infrastructure
- Designed piping layout and sensor placement using AutoCAD
- Prepared technical documentation for system implementation and maintenance planning

ADDITIONAL EXPERIENCE (SIDE PROJECT)

- Panel Maker : Design, Assembly, and Wiring of Industrial electrical panels for automation systems
- Automation & Embedded System Developer : Development of microcontroller-based control and monitoring system
- Drafter : Technical drawing using AutoCAD for electrical layout, piping, and instrumentation design/valuation.

PENGALAMAN ORGANISASI

Himpunan Mahasiswa Elektronika

Staff Ahli Divisi Kajian Strategis | Agu 2022 – Agu 2023

- Doing research and analysis on strategic issues related to campus policy, social issues, and technology developments.
- Drawing up short-term and long-term strategic plans according to the organization's vision and mission.
- Designing and coordinating trainings/workshops to boost members' skills in research and strategic analysis.

Koordinator Divisi Acara – Inaugurasi

- Planning and developing event concepts.
- Coordinating the internal team as well as external parties.
- Managing the execution of events all the way through post-event evaluation.

KEY PROJECT

- CNC Automatic Writing System (2024)
- IoT Blood Pressure Monitoring System (2024)
- Face Recognition Door Security System (2023)
- SCADA-Based Cooling Tower System (2023)
- Air Quality Monitoring System (AQMS)
- Water Quality Monitoring System (WQMS)

CERTIFICATION & TRAINING

- Introduction to Programmable Controller & Basic Controller – PT Omron Electronics
- Basic Programming of PLC Omron (Training)
- Basic Programming of PLC Omron (Test)

TECHNICAL SKILL

- Industrial Automation: PLC, SCADA, Control Systems
- Instrumentation: Sensor Calibration, WQMS, AQMS, Field Monitoring Systems
- Electrical: Panel Design, Wiring, Troubleshooting, Power Distribution
- Embedded & IoT: Arduino, Basic Embedded Systems Integration
- Design Tools: AutoCAD, Altium, KiCad, Proteus
- Software: MATLAB (Basic), Microsoft Office

Language : Indonesia (Expert), English (Intermediate)
